## 1. About Us

We are a mid-sized software company founded in 2015, providing SaaS tools for team collaboration and workflow automation. We serve over 3,000 customers across 40 countries, ranging from small startups to large enterprises.

## 2. Mission

To help teams get meaningful work done with less friction, by building software that adapts to how people actually work rather than forcing new workflows on them.

## 3. Organizational Structure

- Engineering — product development, infrastructure, and platform reliability.
- Sales — new business, account management, and partnerships.
- HR — talent acquisition, employee experience, and organizational development.
- Operations & Finance — company operations, finance, and legal.

## 4. Offices

Headquarters: Bengaluru, India. Regional offices: Austin, USA and Amsterdam, Netherlands. The company operates a hybrid work model, with most roles requiring in-office presence 3 days per week.

## 5. Company Values

- Customer obsession — decisions start from customer impact.
- Ownership — employees are trusted to make decisions within their domain.
- Transparency — information is shared openly by default, restricted only where necessary.
- Continuous learning — mistakes are treated as learning opportunities, not blame events.

## 6. Products

The company's flagship product is a workflow automation platform that integrates with common productivity tools to automate repetitive cross-tool tasks. A newer analytics add-on was launched in 2025 to provide usage insights to enterprise customers.

## 7. Growth

The company has grown from 40 employees at founding to approximately 450 employees today, with headcount roughly split 45% Engineering, 30% Sales, 15% Operations & Finance, and 10% HR.
